

Quality and Safety Fellowship

The curriculum can be personalized to support the fellow's strengths and career goals.

Core Curriculum

- Improvement science
- Quality improvement
- Patient safety
- Health system operations
- Leadership
- Faculty development

Deep Dive Electives: The fellows should further advance their learning and take a deep dive into one or two areas of interest from the core curriculum, with the approval of the fellowship director.

Faculty Development:

- Learn teaching skills and curriculum design, implementation and evaluation.
- Teach residents and mentor their QI/PS projects to completion.
- Complete OhioHealth Junior Faculty Development course.

Leadership Training:

- Attend hospital and health-system QI/PS committee meetings, clinical guidance councils, Kaizen events, safety rounds, M&M conferences and Medical Operation Team meetings.
- Complete the OhioHealth Physician Leadership Academy.
