

# Travel to/from Riverside Methodist Hospital during Rt. 315 Bridge & Road Project

June 15–Nov. 1, 2009

Rt. 315 is under construction from I-670 to Ackerman Road. Both directions of traffic are using the southbound lanes. There are two lanes of traffic maintained in each direction. As a result of the lane restrictions, many of entrance and exit ramps are closed. Please see a map detailing these closures on the other side.

## Getting to Riverside Methodist Hospital:

**All exit ramps from Rt. 315 providing access to Riverside Methodist Hospital are open; however you may need to allow additional travel time.**

## Leaving Riverside Methodist Hospital:

If you are traveling southbound from the hospital, you will need to use an alternative route when leaving because the entrance ramps onto Rt. 315 South are closed. Alternative routes to consider include:

### Henderson Road

★ Go north on Olentangy River Road. You can access Rt. 315 South from Olentangy River Road just north of Henderson Road.

### Olentangy River Road to Goodale Blvd.

★ Go south on Olentangy River Road. You can access Rt. 315 South from Olentangy River Road just north Goodale Blvd.

### I-71

★ Go east on North Broadway to access I-71 South.
