

Where do people in Ireland turn when they need critical limb care?

The same place you do.

When Bill Doherty in County Clare, Ireland was told he might lose his leg due to a vascular problem, he went to one of the few places in the world capable of saving it – Riverside Methodist Hospital. By using a comprehensive approach, our Critical Limb Care team is able to save patients' arms and legs even without performing surgery. It's a technique that's revolutionary and it's just one of many world-renowned procedures taking place at Riverside Methodist.

90% of all vascular problems go undiagnosed. So if you have persistent pain or cramping in your legs or if you just want to hear more about Bill's incredible story, go to www.ohiohealth.com/riverside.
