

He'd travel to the ends of the Earth to save his leg.

Turns out, he only had to go as far as Columbus, Ohio.

When Bill Doherty from Ennis in County Clare, Ireland was told he might lose his leg due to peripheral vascular disease, he went to one of the few places in the world that was capable of saving it without open surgery - Riverside Methodist Hospital in Columbus, Ohio. Using a comprehensive, multi-disciplinary approach to treating PVD, as well as a revolutionary catheter procedure via pedal access, the Riverside Critical Limb Care team is able to save patients' legs (and arms) without surgery. It's an approach that's making a big difference in the lives of thousands and in the field of medicine. And it's just one of many world-renowned innovations from the physicians at Riverside Methodist Hospital.

To connect with a physician at Riverside Methodist performing critical limb care or other innovative procedures, call (614) 566-4660.
