## Residency Program Highlights

- 100% first board pass rate for past 15 years
- 100% postgraduate placement (employment or fellowship)
- Expanding program - recently increased to 6 residents per year (approved for 24 total residents)
- Family-like environment, excellent rapport between residents and attending physicians
- Staff dedicated to encouraging critical thinking and development of surgical skills
- Rigorous training in both community and University-based environments
- Unique opportunity to train in multiple settings – urban at a Level 1 trauma center at Grant Medical Center, community-based at Doctors Hospital, University setting at The Ohio State University and rural at O'Bleness Hospital
- Extensive surgical exposure – focusing on laparoscopic, robotic and vaginal surgeries- Exceeds annual ACGME surgical case requirements
- Intensive OBGYN ultrasound curriculum
- Focus on laparoscopic surgical training
- Formal DaVinci robotic training curriculum
- State-of-the-art simulation lab with laparoscopy, hysteroscopy, ultrasound, advanced patient simulation and DaVinci robotic training
- Annual clinical anatomy review course with cadaver dissection
- Dedicated research staff to provide resources and assistance
- Comprehensive, resident-run outpatient women's health clinic, open 5 days a week. Includes on-site Maternal Fetal Medicine, Urogynecology, OMM and Gynecologic Oncology clinics.

## Didactics

- Protected education time
  - Dynamic, multi-faceted daily education, including small group discussion of chapter readings, practice bulletins, committee opinions, review of current evidence-based articles
  - Formal educational block time on Wednesday mornings – including ultrasound training, simulation training, guest lectures, mock oral board preparation, multi-disciplinary lectures
