

WE NEVER STOP LEARNING.

At OhioHealth, we want to do more than support the careers of our physicians — we want to grow their talents and help them reach their highest aspirations. We see your education not as an expense, but as a strategic investment in the health system.

Our simulation centers, like our Level I Comprehensive Educational Institute, are accredited by the American College of Surgeons. Each simulator can perform more than 72,000 patient condition response combinations, and can be used with other devices to train medical professionals in the optimal use of medical equipment and drugs.

Through our large assortment of development courses, OhioHealth gives you the opportunity to expand your knowledge in such areas as crucial conversations, public speaking and charting your career path. And our scholar program offers associates the chance to pursue specific targeted degrees and certifications.

We know growth isn't limited to just education, so we rely on the voices and leadership of our physicians. We have Clinical Guidance Councils, a Physician Diversity Workforce Group, and the OhioHealth Physicians Leadership Institute to help you help you lead, grow and innovate in all facets of your career.

And we value the expertise of our strong physician network. We seek out your ideas for improving the patient experience and implement them. It's one of the reasons why we are regularly ranked in the top 10 percent of Press Ganey's hospital experience survey, which measures physician engagement and satisfaction.
