**UNDERSTANDING**
We start by better understanding the source of your pain and/or symptoms. We'll talk with you about your pain and other symptoms, how these may be hindering your daily activities, solutions you've tried that haven't helped, and your goals for relief and improvement.

**CONSERVATIVE APPROACH**
Once we've diagnosed your condition, we'll develop and coordinate a comprehensive care management plan, taking as conservative an approach as possible.

**ADVANCED TREATMENT**
If you require more advanced treatment, we perform a range of medical treatments and other clinical therapies.

If evaluation by a spine surgeon is necessary, we will facilitate referral to one of our best-in-class OhioHealth spine surgery experts, closely consulting and collaborating with them about your condition.
