Emergency Medicine Curriculum

OGME I
- Emergency medicine: 5 blocks
- Pediatric emergency medicine: 1 block
- Critical care medicine: 2 blocks
- Internal medicine: 1 block
- Anesthesiology: ½ block
- General surgery: 1 block
- Orthopedics: 1 block
- Otorhinolaryngology: ½ block
- Obstetrics and gynecology: 1 block

OGME II
- Emergency medicine: 6 ½ blocks
- Pediatric emergency medicine: 1 block
- Critical care medicine: 2 blocks
- Cardiology: 1 block
- Neurology: 1 block
- Ophthalmology: ½ block
- Elective: 1 block

OGME III
- Emergency medicine: 6 blocks
- Pediatric emergency medicine: 1 block
- Emergency ultrasound: 1 block
- Toxicology: 1 block
- Trauma: 1 block
- Surgical intensive care: 1 block
- Pediatric procedures: 1 block
- Elective: 1 block

OGME IV
- Emergency medicine: 6 ½ blocks
- Pediatric emergency medicine: 1 block
- Administrative emergency medicine: 1 block
- Ground and air EMS: 1 block
- Emergency medicine teaching: ½ block
- Medicine selective: 1 block
Didactic Curriculum

Our didactic curriculum is centered on a problem-based, small group discussion format that engages the adult learner in critical thinking and the application of medical knowledge into a real world clinical setting. Residents are assigned readings from both a standardized emergency medicine textbook as well as a current review article on a curriculum topic. Faculty members engage residents in a thorough review of the day’s topic as well as a discussion of the application of treatment modalities in a clinical setting. These discussions are supplemented with hands on simulations to reinforce the key concepts and to hone clinical and procedural skills. In addition, we offer a written and oral board review, a monthly journal club, radiology review, toxicology lecture series, and an administrative and practice management lecture series.

Simulation activities include multiple patient management, trauma and critical care scenarios, and EMS field exercises and procedural competencies such as airway management, cardiopulmonary resuscitation, ultrasound, and osteopathic manipulative medicine. In addition, residents participate in the following standardized courses:

OGME I
Advanced Cardiac Life Support
Basic Life Support

OGME II
Pediatric Advanced Life Support
Advanced Trauma Life Support

OGME III
Airway Course

OGME IV
High Risk Emergency Medicine
