Our curriculum is designed to be innovative, wellness oriented, and learner focused, and places a strong emphasis on comprehensive outpatient care by including scheduled patient time in the office most days.

Longitudinal curriculum components include integrated behavioral health, practice management, sports medicine, wellness, and an elective osteopathic manipulation component.

Our curriculum starts with a new approach, which we have built from the ground up. Our “Dublin difference” includes:

- Daily time in the office for every PGY level
- 6 elective rotations, creating built-in flexibility
- Outpatient based experiences, even during some rotations traditionally heavily inpatient based
- Integrated ICU with no dedicated ICU block
- No dedicated Night Float block
- Team-based care which replicates the practice model of the future
- Case-based didactics using a variety of methods to facilitate asynchronous learning
- Concentrations and longitudinal tracks

**First Year Curriculum**

Our first year residents spend the majority of their first block together, being immersed in the foundations of family medicine during the Intro to Family Medicine block, and then gain experience rotating through different services in the hospital and community.

First year residents are scheduled to see patients in the office every day.* Weekly didactics bring the group together.

* Patients will be scheduled 2 times each week during the 4 week block at Nationwide Children’s

**PGY1**

- Intro to Family Medicine: 4 wks
- Ambulatory Family Medicine: 4 wks
- Adult Inpatient Medicine: 16 wks
- Pediatric Inpatient Medicine: 4 wks
- Adult Emergency Care: 4 wks
- General Surgery: 4 wks
- Newborn Care: 4 wks
- Community Medicine: 4 wks
- Maternity Care: 8 wks
Osteopathic Recognition
The Dublin Methodist Family Medicine Residency Program has applied for ACGME Osteopathic Recognition and anticipates a favorable decision in September. Curriculum details will be posted at that time.

Longitudinal Curriculum
All residents will be required to participate in the elements of the Longitudinal Curriculum. These include Integrated Behavioral Health, Practice Management, Sports Medicine, and Wellness.

Areas of Concentration
Electives focusing on Women’s Health, Emergent/Urgent Care, Sports Medicine, Hospice and Palliative Care, Inpatient Medicine, and Behavioral Health lead to greater confidence in the selected area.

Tracks
Our tracks, a combination of electives and integrated longitudinal experiences, include Leadership Development, Faculty Development, Population Health, and Quality and Patient Safety.

Concentrations, Tracks, and Longitudinal Curriculum
We are excited about the flexibility we are able to offer through our Areas of Concentration, Tracks, and our Longitudinal Curriculum.

- Residents are not required to commit to an Area of Concentration or a Track
- Electives and experiences offered as part of an Area of Concentration or a Track are open to all residents

Second Year Curriculum
Our second year residents build upon their knowledge and experience through additional specialty rotations while increasing their daily continuity patient visits. They also serve as supervisory residents during the inpatient medicine months. The two months of elective time provide ample opportunity to explore areas of interest.

PGY2
Ambulatory Family Medicine 4 wks
Ambulatory Pediatrics 4 wks
Adult Inpatient Medicine 8 wks
Adult Emergency Care 4 wks
Pediatric Emergency Care 4 wks
dermatology 4 wks
Orthopedics 4 wks
Cardiology 4 wks
Endocrinology 4 wks
Gynecology 4 wks

Third Year Curriculum
Third year residents are preparing for independent practice by playing an increasing leadership role for the care of their patients and with their interdisciplinary care team. The four months of elective time provide ample opportunity to explore areas of interest.

PGY3
Ambulatory Family Medicine 4 wks
Adult Inpatient Medicine 8 wks
Otolaryngology/Ophthalmology 4 wks
Urology/Radiology 4 wks
Nephrology 4 wks
Infectious Disease 4 wks
Geriatrics 4 wks
Pediatric Urgent Care 4 wks
Electives 16 wks

Osteopathic Recognition
The Dublin Methodist Family Medicine Residency Program has applied for ACGME Osteopathic Recognition and anticipates a favorable decision in September. Curriculum details will be posted at that time.
