

Dublin Methodist Hospital

Family Medicine Curriculum

Our curriculum is designed to be innovative, wellness oriented and learner focused, placing a strong emphasis on comprehensive outpatient care by including scheduled patient time in the family medicine practice office most days.

Longitudinal curriculum components include integrated behavioral health, practice management, sports medicine, wellness, and an elective osteopathic manipulation component.

The “Dublin Difference”

- Daily patient time in the Family Medicine Practice for every PGY level
- Seven elective rotations, creating built-in flexibility and providing opportunities for additional experience in areas of interest
- Outpatient-based experiences, even during rotations traditionally heavily inpatient based
- Integrated ICU with no dedicated ICU block
- Limited night time shifts, without dedicated night float weeks or blocks
- Team-based care that replicates the practice model of the future
- Case-based didactics using a variety of methods to facilitate asynchronous learning
- Elective areas of concentration and tracks
- An ACGME designated Osteopathic Recognition Track for interested residents

First Year Curriculum

Our first year residents spend the majority of their first block together, being immersed in the foundations of family medicine during the Intro to Family Medicine block, then gain experience rotating through different services in the hospital and community.

We believe that great outpatient doctors are created in the family practice setting, and this begins in the PGY 1 year. First year residents are scheduled to see at least one patient each day.* Weekly didactics bring the group together.

*PGY 1 residents will see patients once per week during the 4 week Pediatric Inpatient Medicine block.

Intro to Family Medicine	4 wks
Ambulatory Family Medicine	4 wks
Adult Inpatient Medicine	16 wks
Pediatric Inpatient Medicine	4 wks
Adult Emergency Care	4 wks
General Surgery	4 wks
Newborn Care	4 wks
Community Medicine	4 wks
Maternity Care	8 wks

Second Year Curriculum

Our second year residents build upon their knowledge and experience through additional specialty rotations while increasing their daily continuity patient visits. They also serve as supervisory residents during the inpatient medicine months. Elective time provides the opportunity to begin to explore areas of interest.

Ambulatory Pediatrics	4 wks
Adult Inpatient Medicine	4-6 wks
Adult Emergency Care	4 wks
Behavioral Medicine	4 wks
Pediatric Emergency Care	4 wks
Dermatology	4 wks
Orthopedics	4 wks
Cardiology	4 wks
Geriatrics/Hospice and Palliative Medicine	4 wks
Gynecology	4 wks
Electives	6-8 wks

Third Year Curriculum

Third year residents prepare for independent practice by playing an increasing leadership role in the care of their patients and with the interdisciplinary care team. Elective time provides ample opportunity to explore areas of interest.

Ambulatory Family Medicine	4 wks
Adult Inpatient Medicine	4 wks
Otolaryngology	2 wks
Ophthalmology	2 wks
Radiology	2 wks
Urology	2 wks
Nephrology	2 wks
Infectious Disease	2 wks
Endocrinology	2 wks
Pediatric Subspecialty	4 wks
Sports Medicine	4 wks
Electives	22 wks

Areas of Concentration, Tracks and Longitudinal Curriculum

We are excited about the flexibility we are able to offer through our areas of concentration, tracks and longitudinal curriculum.

Residents are not required to commit to an area of concentration or track, and electives and experiences offered as part of an area of concentration or track are open to all residents.

Areas of concentration are available in Behavioral Health, Hospice and Palliative Care, Inpatient Medicine, Women's Health, Urgent/Emergent Care, and Sports Medicine.

Tracks are offered in Faculty Development, Quality and Patient Safety, Leadership Development, Population Health, Point of Care Ultrasound, and Osteopathic Manipulative Treatment.

Our longitudinal curriculum incorporates Behavioral Health, Geriatrics, Practice Management, Sports Medicine and Wellness.
