OhioHealth Research and Innovation Institute

A compendium of clinical research and innovation accomplishments

To be successful today and into the future, OhioHealth has to be innovative – both in our thinking and our approach – and the OhioHealth Research and Innovation Institute (OHRI) helps us bring that innovation to life.

Innovation at OHRI is vital to OhioHealth’s recognition as a leading health system working to develop and advance medical breakthroughs. Through the work of OHRI, we are at the forefront of transforming healthcare as we evaluate new drug therapies, medical devices and procedure improvements.

This isn’t a small initiative for us. This is the core of how OhioHealth works, and OHRI is an essential part of that.

Our research not only keeps us at the forefront of medicine, but it also ensures that our patients consistently receive the best care available. The work featured in this compendium illustrates the significant range of innovative thinking our healthcare professionals engage in daily.

All of these efforts help us realize our vision, mission and values by delivering new and better ways to bring care to the patient’s bedside, while delivering value to the patient and benefit to the community. Here’s to our advancements and to the physicians, nurses and research teams helping us deliver the best care to our community every day. I look forward to their continued contributions and to sharing their innovative discoveries with you.

Sincerely,

Bruce Vanderhoff, MD
Senior Vice President and Chief Medical Officer
OhioHealth
Research and scholarly activity are critical to the advancement of knowledge. At OhioHealth, our patient population and top-notch clinicians and scientists create an excellent environment for clinical research. We have an obligation to the community at large to improve care for patients through rigorous scientific endeavors, and dissemination of our gained knowledge is key to our success. The following are publications and presentations authored by OhioHealth physicians and associates between 2012-2014.

**Journals**

**Abaza R.**
Technical considerations in robotic nephrectomy with vena caval tumor thrombectomy. 
*Indian J Urol.*
2014;30(3): 283-286
